## EDUCATION

**Ramco Institute of Technology, Rajapalayam, Tamil Nadu**

B.Tech in Computer Science and Business Systems

**Expected 2027**

Rajapalayam, Tamil Nadu

## EXECUTIVE SUMMARY

- B.Tech student specializing in Computer Science and Business Systems with practical experience in software development, embedded systems, AI, and robotics. Skilled in C, Java, Python, Arduino, ESP32, TensorFlow, and problem-solving through industry projects and national-level competitions.

## EXPERIENCE

**AI R&D Intern – Meritus AI**

**2025 (1 Month)**

Computer Vision & Model Development

On-site

- Built TensorFlow/Python models for zoo animal detection; performed annotation, preprocessing, and validation.
- Optimized models and prepared technical documentation for client delivery.

**AI Project Contributor – Ramco Mills Ltd.**

**2026 (2 Month)**

PPE Detection System

Rajapalayam, TN

- Contributed to an AI-based PPE detection system with image annotation, dataset prep, and model training.
- Collaborated on model evaluation for industrial safety applications.

**Freelance Software & Web Developer**

**2024 – Present**

Full-Stack Development

Remote

- Designed, developed, and deployed responsive web apps; managed full lifecycle from requirements to deployment.
- Built scalable backends and user-friendly interfaces for multiple clients.

## PROJECTS

**Military Radar System** | Arduino, Ultrasonic, JS, HTML, CSS

- Built a radar-style visualization for real-time object monitoring using sensors and a web dashboard.
- Enabled live distance tracking through embedded-web communication.

**WRO Robotics Projects** | Arduino, ESP32, C++, Sensors

- Developed autonomous robots for World Robot Olympiad; integrated sensors for navigation.
- Created supporting web apps and applied hardware-software integration.

**CyberShield – AI Cybersecurity** | React, TypeScript, Python, ML

- Built a platform with phishing detection, AI chatbot, and threat analysis using ML models and REST APIs.

**Military Object Detection** | TensorFlow, Python, OpenCV

- Developed real-time detection for military vehicles; trained custom models and implemented webcam inference.

**NGO Web Platform** | PHP, MySQL

- Developed a dynamic platform with backend logic and responsive UI, deployed for production.

## TECHNICAL SKILLS

**Languages:** C, Java, Python, SQL, C++

**Embedded & Robotics:** Arduino, ESP32, Sensor Integration, ROS 2, Serial Communication

**AI & Vision:** TensorFlow, OpenCV, YOLO, Machine Learning, Computer Vision

**Databases & Tools:** MySQL, Firebase, Git, Linux, VS Code

**Core CS:** DSA, OS, OOP, DBMS, Computer Networks

## ACHIEVEMENTS & LEADERSHIP

- National Competitions:** SIH 2024 & 2025 Grand Finalist, WRO National Finalist.
- Hackathons:** Winner – EUPHORIA 2K26; Top 8 – EUPHORIA 2K25 (IBM recognition); 1st Prize – LEAP Open House (2024).
- Robotics:** Winner – TCE & EUPHORIA Line Follower; Top 5 – Robothon (2024 & 2025).
- Leadership:** Organized Cybersecurity Workshop for 100+ students; Resource Person for IoT course.
